**Launch of the United Nations'
Global Assessment Report 2015
and Dialogue on Implementation of the
Sendai Framework**

減輕災害風險全球評估報告2015發佈會暨
仙台減少災害風險框架討論

Wednesday, 2 December 2015

9:30 am

Room M1803, 18/F, Li Ka Shing Tower, The Hong Kong Polytechnic University
Hung Hom, Kowloon, Hong Kong

**PolyU–The United Nations Office for
Disaster Risk Reduction Collaboration Programme**

香港理工大學—聯合國國際減災戰略署合作項目

Did you know that of all the cities in Asia, Hong Kong has the highest risk for natural disasters? And that most Hong Kong people are unprepared to deal with a disaster? Sustainable development cannot be achieved unless disaster risk — for natural *and* man-made disasters — is reduced. What can Hong Kong do to increase its disaster resilience and to develop sustainably?

If you want to find out more about risk management for business or your work or business involves reducing disaster risk, facilitating sustainable development, reducing poverty, planning or managing the city, protecting or restoring ecosystems, or addressing climate change, you're strongly urged to attend the Hong Kong launch of the United Nations' flagship Global Assessment Report on Disaster Risk Reduction 2015 (GAR15) on Wednesday, 2 December 2015, at PolyU. You'll learn about GAR15's findings and recommendations and the implementation of the UN's new Sendai Framework for Disaster Risk Reduction 2015-2030.
